

src/Model/Base/my\_frame.h

```
graph TD; A[src/Model/Base/my_frame.h] --> B[QFrame]; A --> C[HBoxLayout]; A --> D[VBoxLayout];
```

The diagram illustrates a header file, `src/Model/Base/my_frame.h`, which serves as a base for three classes: `QFrame`, `HBoxLayout`, and `VBoxLayout`. Three blue arrows point from the header file box to each of the class boxes, indicating that these classes inherit from or are defined in terms of the header file.
